To replace the Extended Battery Modules EBMs 1. Unplug the EBM cable from the UPS. EBM Connections 120V UPS Model Shown Testing New Batteries Press and hold the button for three seconds to initiate a selftest. WARNING S Do not dispose of the battery or batteries in a fire. Batteries may explode. Troubleshooting Guide Alarm or Condition Possible Cause Action The power cord is not connected correctly. Check the power cord connections. The wall outlet is faulty. Have a

qualified electrician test and repair the outlet. The main utility breaker is off. Prepare equipment for shutdown. The UPS is in Bypass mode. The equipment is transferred to utility power; however, the utility power continues to be passively filtered by the UPS. Knowledge of computer applications such as Microsoft Windows and Microsoft HyperTerminal are strongly recommended as well. Operational concepts will be taught in the form of interactive lab exercises. The relevant installation and operation manuals will be used during instructional delivery, and at no point will students be provided with accompanying service manuals. In such instances, onsite training will be conducted in the same manner as courses conducted in Raleigh provided that the customer has similar switchgear and has provided the technical instructor with a release on the UPS. Instances in which the customer does not provide a release on the UPS, the technical instructor's ability to mimic the training provided at the Raleigh training center will be severely impacted. Additionally, technical instructors may also be called upon to tailor instructional delivery based on situations outside of Eaton's control such as custom site installations, the customer's request to shorten instructional time, etc.. Please choose a different delivery location. Our payment security system encrypts your information during transmission. We don't share your credit card details with thirdparty sellers, and we don't sell your information to others.
