

Remove the transportation safety devices

CAUTION!
The transport bolts must always be removed before using the appliance for the first time and must be retained for any subsequent transport (e. g. when moving).

- Release all screws and using the SW 13 wrench until they can be moved freely.
- Completely remove the transportation safety device (screw and spring, washer and bush).

- Insert the covers.

Storing the transportation protection devices
Always keep the transport bolts for subsequent transportation of the appliance (e. g. when moving house).

- Store transport bolts and (screw, washer and bushing onto bolt).

Aligning the washing machine

All four appliance feet must be firmly on the ground. The washing machine must not wobble.

Align the washing machine with the aid of the four height-adjustable feet and a spirit level.

- Loosen the lock nut 1 using the wrench.
- Adjust the height by rotating the foot 2.
- Tighten the lock nut 1 against the housing.

Connecting the power

Attention

Connect the washing machine only to an alternating current via a correctly installed earthed socket.

The mains voltage must correspond to the voltage specification on the washing machine (parameters).

Connected load and the required fuse are indicated on the rating plate.

Ensure that:

- The mains plug and socket are compatible.
- The cable cross-section is adequate.
- The earthing system has been installed correctly.

The mains cable may be changed (if required) by an electrician only. A replacement mains cable can be obtained from customer service.

Do not use multiple plugs / connectors or extension cables. In the event that an earth-leakage circuit breaker is to be used, only use types marked with the following symbol (L). Only this symbol can guarantee compliance with all current regulations.

Do not pull out the mains plug by tugging the cable. Do not insert/pull out the mains plug with wet hands.

I downloaded the manual from Bosch but still cant figure it out. Does anyone know where is for what I think the middle one is for fabric softener. Also, can you use liquid bleach. And, if so, where does that go In my search for this information Ive been really horrified to read about all the negatives experiences with this washer due to mold and smell.

I am really hoping for the best here. Im kind of at my wits end. Thanks to all for any info. Or only powdered bleach in the II compartment Have a lovely, clean, holiday. I doubt youll want to hike to the basement to use the range. If not now, then certainly later. Nothing like trekking to the opposite end of a space to get the butter you forgot. Heres a nice set up. My daughter has her range under a plate glass window so she can see the pool, and I was surprised how well it worked. Youd probably want a down draft vent system in that case. You could put the fridge on the dining space end and the ovens on the other with the cooktop in the middle. Then the sink and dish washer could go in the island with a dish and silverware drawer on the dining end to make setting the table easy. Youd not have to clutter up with stools and could have drawer storage on the back side of the island. Micro over oven. See More Bosch SHP878WD5N dishwasher installation Q Comments 13 Basically they just ruined your brand new dishwasher. They are NOT made to be drilled through to mount them. Youre just asking for leakage and possible damage to your floor, subfloor, walls and cabinetry. There is absolutely NO way that I would accept this.. See More What do you think of my kitchen layout. Q Comments 25 You all are fantastic. Thanks to everyone for your feedback, we really appreciate it. We are going to make some changes to the floor plan based on everyones feedback. Were going to see what we can do to increase the living room width for better proportions. We will certainly do as you recommend. The master shower may change dimensions a little bit to make sure the

freestanding tub is truly free standing and is not a burden to clean around. However, we are looking forward to a large shower. Things get busy and my wife and I love our time in the shower together. Its so wonderful and so appreciated on our end. Our previous house had a slab 4x9 island and we really loved it.

<http://www.drupalitalia.org/node/71625>

We may end up widening the house a couple of feet just to try to get this right while keeping some of our existing dimensions. The SxS ovens will be inwall for sure. You are correct, the garage is 34 wide and 23 deep. Were really only planning for two cars to go in there, but with 3 motorcycles and sleds in the future, well see how that goes. My wife is OK with building a toy barn down the road if we feel like shop space is tight. If we end up widening the house 3 or so to solve some other issues Ill make sure each bay gets another foot. For the bathrooms, were planning on shelves at the bottom of the vanity that can hold a couple of folded towels. We had the attic space so were planning on getting a truss package to allow for that bonus space. Thank you! Were hoping with reworking the mudroom and making each bedroom have ensuite baths well solve most of your concerns. The bonus space above the garage is a concern but Im not sure were going to be able to change that much outside of adding a door at the stairs or something like that. Thanks again everyone for all of your thoughts and feedback. SO SO helpful!! When we get the floor plan reworked Ill see about posting it again for another round..See More Bad design that makes you utter WHY. Q Comments 252 Haha, Jan, you are once again right on the money. I cant remember the last time I had the need to use a straw to drink anything. I grew up thinking that straws were for children who couldnt drink from a cup. Why adults need them is beyond me. And yes, in just under 2 months, the state of NY will join Suffolk County in banning those miserable thin plastic grocery bags, and I say good riddance to them. Ive been bringing my own reusable bags for quite a while now, and it is much better. It always kills me to see the cashier try to pack a ginormous laundry detergent container or 6pack of soda in a thin plastic bag, which will break as soon as you pick it up!.

See More Terry Nostrebor 4 years ago I signed up just to comment on this question, which I also faced as someone renting an apartment with this washer installed. Where is this How do I do this Oh, I guess Im just supposed to figure it out via trial and error. Also, dont use cheap fabric softener and then as little as possible. Do believe Ecover is plant based. I picked it up on the fly at the health food because the fragrance was OK. Pinky, Id love you to try it and get your opinion. Will send you some. I think it gives great results. Its my new first choice. This video was actually pretty helpful its an an 8 minute demo on both the Bosch Axxis washer and dryer I actually thought you put the washing liquid in the right compartment, not the left despite dadoes comment, so the video was great to watch and get clarification. Thanks all, and thanks to mskathyny for the question clearly not a dumb one after all! Helps prevent detergent residue build up. Best to check the instruction manual to confirm which. Majority of manufacturers have them available at their web site via model number search. I let it run with no clothes and let it mix with the water for about 20 seconds and then add clothes. If so, does pod go in the far left compartment. Thumbs down and no thank you I just bought a second hand Bosch Maxx from my sister and is my first front loader. I agree with Terry re symbols instead of words to show what to do. Nuts! So it goes, Prewash, main wash and Bleach. What detergents are prewash. I pour softner im the 3rd compartment as it goes straight into the washer. Usually dont bother with the middle or II compartment. Any specific help. I also pour bleach in the 3rs compartment or mix with the 1st compartment. I Use MELLALUCA products and love them. Pressing the temperature button twice shows a snowflake and sets a defrost function.
