Bosch PHO 1 Powerful with Smooth Moves Like a sander, the planer is a tool for working on wooden surfaces. While a sander processes the wood using the grit on the sanding paper, a planer cuts off entire chips. In contrast to standard, handheld planers, this Bosch power tool planer works with a blade drum that rotates at high speed. It provides fast and precise planing with high material removal rate.

The PHO 1 works in a typically Bosch way fast, precise and efficient. The combined front handle and cutting depth adjustment knob provides a safe handling and precise cutting depth adjustment. The patented Wood Razor blade system ensures easy planing without having to exert force, the easiest and fastest blade changing method and high surface quality. The compact tool features a powerful 500 watt motor and weighs only 2.0 kg, which ensures low fatigue working over prolonged periods of time and under difficult working conditions. The PHO 1 can last up to 50 hours of uninterrupted running without a motor burnout. The PHO 1 copes with most planning tasks without problem. The no-load speed of the tool is 19,000 rpm. The Bosch Planer PHO 1 features a cutting depth up to 1.5 mm and a rebating depth of maximum of 8 mm, making it ideal for projects such as Chamfering edges Smoothing and planing doors Rebating Fitting windows, worktops and shelves Removing paint The rebating depth stop limits the planing depth during rebating, while the parallel guide limits the rebating width. Patented Wood Razor System The electronically balanced blade drum provides users with a higher cutting speed and a higher planing quality on the surface. The included blade is a high quality tungsten carbide blade, which lasts twice as long as a twoblade system as friction is reduced. Users are able to change the knife of the blade quickly and easily by loosening only two Allen screws. Dust Extraction Facility The dust extraction capability is via the integrated dust spout at the side of the machine. Simply connect a suitable vacuum cleaner via the optional adaptor such as the Bosch PAS 1121 or a dust bag optional accessory for effective dust management and a cleaner working environment at all times. Auxiliary Handle The adjustable auxiliary handle has two functions. Firstly, it provides safe handling of the planer and secondly it can be used to set the cutting depth stepbystep, even during planing.

Morley 5.0 out of 5 stars I bought this recently to trim down a few doors after getting new carpet fitted in all of the bedrooms and this makes the job a hell of a lot easier. Build quality also seems very good better than the cheap offbrand power tools Ive had in the past though I havent used it often enough to really put it to the test. The fact that it only takes of a maximum of 1.5mm was not a problem as I only wanted to trim a little at a time. It does come with a collection bag for the shavings but this requires frequent emptying. Overall I was impressed with the product and would recommend it. Not used yet but blade design has changed from two blades to one. Will reserve judgement on that. Only 3 stars given due to the dust bag not being in the sealed Bosch box. The Amazon web site claims one is included and the Bosch box also indicates on should be supplied. Hopefully, my old one will fit as this model is not available anymore on Amazon so no point in returning for a replacement. I have always used handoperated planes but now have arthritis and find it difficult to use my hands. This is not only easy to use it is incredibly effective, the finish smooth and professional. An excellent product. Needs careful handling to keep depth cut setting and avoid overplaning when reaching the edge of work, such as a door or similar length of wood. It has worked well reducing door widths for replacing interior doors and seems like good value.

TIAIs their a part number for the blades they have bought.Is their a part number for the blades they have bought.If they are the right blades, do the grooves have a kind of narrower section about 10mm long near each end.If they are the right blades, do the grooves have a kind of narrower section about 10mm long near each end.If getting other makes of blades, then getting a reputable brand from somewhere that can give a refund if they dont fit. IME the cheaper unbranded blades can give a poor finish, the best Ive had are from Trend.After that, you can post your question and our members will help you out. Amateurs and Experts are both welcome. They've remained sharp after repeated use with no discernible degradation loss of sharpness. The only reason I've bought this reversible blade is each side got notches from accidentally running over hidden nails. I just need a clean blade for high quality finishing. The damaged blades can still be used for first, but still good quality planing of rough wood or shaving paint off wood. I bought the blade in shop as I could get it on the day. Another point is these last so long, not seeming to dull, and nails and nicks aside, that it really is an investment.
