Hand wash only. Do occur. I have the machine from a friend, but the manuals and recipe book that was to be. Try this link Got the slushie maker from home shopping club. Actually it does. Here is a link that should get you the manual Hope this helps Kurt. Froze containers 3 days but ice cream never gets solid at all. Has anyone had this problem. Is the mixture. Back to basics was purchased by Westbend, here is a link to replacement parts on their website. The ice cubes come out slushy and not completely frozen. When begin to dispense ice about an. Answer questions, earn points and help others. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. I have a friend who bought one of these several years ago, but it sat in storage and he never got around to using it, so I recommended we try it sometime, and he agreed to buy the necessary sea salt and ingredients. I stopped by yesterday and we tried it. I used it for the first time after reading the manual and it worked PERFECTLY. We simply used Welches grape juice and orange juice, after filling the ice compartment with slender ice cubes from the auto ice maker in his fridge, and 2.

5 measurements of sea salt. I Turned the machine on and 15 minutes later we had a thick, smooth desert. If you want a slightly thinner slushy that can be sucked through a straw you just dont let it run as long as we did, because ours was the consistency of restaurant quality water ice, needing a spoon to eat it. Its consistency was wonderfully smooth, with no coarse ice chunks. If it comes out watery, then you must simply give it a couple more minutes to run. As stated clearly in the manual, it WONT work with non sugared diet drinks or plain water. Actually it does work, but you have to not pay any attention to the instructions, they dont make any sense. Turn the machine on and gradually pour in the liquid from the top dispenser. It does work. However it does not do diet sodas or fruit juices, only liquids with high sugar content. If you are on a diet, dont use this machine. Some writers say that the machine can walk across the counter top it will if you put too much ice in it, it causes the canister to get cold too quickly, and causes the paddles to stick on the ice on the canister. Too much ice is no good. I think that it is over priced, but the machine is not all that bad. I only give it two stars because the instruction book is bunk. Please try again later. Actually it does work, but you have to not pay any attention to the instructions, they dont make any sense. I only give it two stars because the instruction book is bunk. Please try again later. Please try again later. I have a friend who bought one of these several years ago, but it sat in storage and he never got around to using it, so I recommended we try it sometime, and he agreed to buy the necessary sea salt and ingredients. As stated clearly in the manual, it WONT work with non sugared diet drinks or plain water. Please try again later. Please try again later. Becca 3.0 out of 5 stars I used a crystal light diet fruit punch I had around the house and decided Id throw that in. It ran for about an hour.

<https://labroclub.ru/blog/4-speed-manual-cars>

I Put sea salt, ice, and juice in like the instuctions said, but it just made the punch cold. It made a lot

of clinking noises and froze to the container three times. It wouldn't even let me put the cap on. The second time I did it, I used grapefruit juice. I read that you needed juice with a lot of sugar so I used grapefruit juice. I let it run after following the instructions carefully and in about 15-20 minutes, I had a delicious very finely made grapefruit slushie with no problems of the machine. If you are on a diet, I would not recommend this to you, but it is nice to have every once in a while, as long as you use a REALLY sugary drink. Please try again later. Please try again later. Camera Chick 1.0 out of 5 stars This is going right back to the store. Do not waste your time or money on this thing. Please try again later. Please try again later. Robert L. Morris 4.0 out of 5 stars We are very pleased with the results. It is a bit noisy and it does only make 32 oz of drink at a time but there are only 2 of us so it's plenty. We followed the directions and used rock salt and ice in the canister. We used Gatorade mixed with a bit of snocone syrup and came out with some fantastic treats. We've also tried it with Root beer and again with Cherry limeaid. Wish we had started using it sooner! Please try again later. Please try again later. Amazon Customer 5.0 out of 5 stars Put it in the freezer until it was very cold colder, by touch, than a drink in the refrigerator would feel About 10 minutes and the slushy was complete. Attached photo as proof of how awesome this thing is. Please try again later. Please try again later. Lasthuron 2.0 out of 5 stars I have used a couple times with the top off because it was too noisy. Had to bring inside the house to keep a conversation outside. I use it now as a cooler of drinks you will need to put rock salt and have ice to make it work correctly with lid. Good idea terrible product. Please try again later. Please try again later. Linda 1.

<https://www.micromegamondo.com/images/89-dodge-dakota-manual-transmission.pdf>

0 out of 5 stars It shakes so hard it could literally fall off of the counter. The center section that connects the lid to the canister stops turning and therefore it deals with major resistance and makes horribly loud sounds. If you remove the lid the sounds stop but this machine is not meant to run without its lid. Left uncovered, the ice would melt quickly and the mixture would be exposed. I called EuroPro and the representative said I should be using crushed ice instead of square ice cubes which the owner's manual recommends. When I told her I'd have to use my blender to make crushed ice, she said I could just wrap some ice in a kitchen towel and break it up with a hammer. She was certain the unit would work with crushed ice even though the manual does not make such a recommendation. You'd probably need to come up with about 4 cups of crushed ice to fill the canister. I told her I don't have time to make crushed ice; I just want to fill the unit and have it work. I am returning it to Costco. Don't waste your time and money on this machine. Please try again later. Please try again later. Belen L. Raymond 2.0 out of 5 stars My husband bought this for me for Christmas 2005. I was thrilled until we tried to use the thing. First of all, forget any of the recipes in the book. On that day we tried the very first one. All of a sudden, the machine started jumping around and making a loud clicking noise. We stopped it and looked and there was ice frozen all around the outside of the container. We melted that off and tried again. Same thing. Now, 4 months later, we have managed to get the machine to actually make slushies within 30 minutes only about 30% of the time. The slushies are of a good consistency when they actually work, but our whole family of 6 agrees that this is a better idea than actual product. Takes A LONG time and 32 oz of fluid will only make slushies for 12 people unless you give them out in tiny paper cups. Not good for parties, etc.

<http://petroenterprise.com/images/89-crx-service-manual.pdf>

Kids would be crying all over. Also, the machine is VERY loud. Hard to have a conversation and you need to constantly check it and add tiny bits of ice. A real pain. The pour spout is nice, and it is easy to clean, but the frustration level is so high on this machine. Following their little instruction book to the letter just won't work. Like I said, everyone in our house has tried it, and it is just LOUD and FRUSTRATING, especially since when you crave a slushie, you CRAVE a slushie and want it then, not maybe, if you are lucky, in 30 minutes or so. Machine needs improvements. I'd spend my money on a

better machine. Sad to say, but only 2 stars. Please try again later. Please try again later. C. Garcia 3.0 out of 5 stars Slushies took about 8 minutes to make about 2 full servings. You use ice in the aluminum canister mixed with rock salt as it spins it creates frost around the outside of the canister where the drink is which is scraped off as it spins. Great for just a few people at a time. I would not recommend it for parties as it takes too long to keep up with thirsty guests. Ice quickly melts and has to be refilled over and over again so basically you will be tending to this machine during your party to keep filling it with ice and desired drink. Slushie is great when its finally ready no ice chunks and is completely smooth. Does not work well with alcohol drink mixture with alcohol never turns to slush because alcohol doesnt freeze so you actually have to add the alcohol last before serving. There is something I found on ebay that offer plans on how to build something like this with common items that can be bought at homedepot, etc. Please try again later. Please try again later. In our database you will get access to 131 official Bravetti documents in which, you can find the necessary and reliable information right now. In addition, you can always contact other users with specific issue. Here, your favorite looks cost less than you thought possible.

Imagine having the option produce any slush flavor you want, at any time With its 72ounce capacity for frozen drinks, it's the perfect toolkit for anyone hosting parties or other fun gatherings. There are many things we loved about the Tahiti by Margaritaville, one of them definitely has to be the low noise level. Usually, with any kind of blender or slushy machine, the loud noise is inevitable. But with the Tahiti, the noise was much lower, in fact, you can actually talk to people while making your frozen drink of choice.

We also loved the reliability factor of the machine, we've been actively testing it for over 6 months now and never had any problems, the fact that it comes with a 1year warranty is just another bonus. Speaking of covering your frozen drink needs, who else hates the mess that comes with making slushies. Luckily, that simply isn't the case with the Tahiti, it's super easy to clean and you won't have to worry about the big mess ever again. Whether you want shaved ice, slushies, snow cones or some other frozen drink, the machine has you covered. I had the single margaritaville and when I actually watched the video of how this works I had to buy it! You can make 3 pitchers of your favorite frozen beverage at once. It helps cut down the time when you have a crowd. I only wish I could find a travel bag for it!" What we really liked about the VBENLEM is the incredible quality of both the machine and the materials used. The machine is made of mainly stainless steel and ABS, which ensures durability and a long life span. We also noticed how well the machine is designed, the entire design is focused on the user, everything is extremely simple and easy to use, including the control panel. The control panel allows you to switch between different modes, like DAY and NIGHT mode, which adapt the power consumption and the way how the machine is operating. It's design, control panel and the features are all designed for making your life easier, it's one of our favorite machines on the list. I use it every day. We love slushies and now we can make our own. We love them so much. This machine makes great. 8" With it, you can easily make drinks up to 32 ounces at a time. Its bright red color and durable materials make it an ultimate summer accessory. It is perfect for smooth frozen drinks and has an easyflow spout. It is easy to clean as it can be detached from the base and has a separable cool drip tray with a cup.

It makes fantastic frozen drinks like soda, daiquiris, margaritas and fruit slushies. It adds thirstquenching fun to any occasion. It is lightweight and easy to carry, almost as portable as the best slushy maker cup. You can use, clean and maintain it easily. You can also use it for commercial purposes and open a slushie shop. It is recommended for both home use and parties. There are many good slushy maker cups like the chill factor or the cool gear slushie maker cup. It's the perfect solution for anyone looking to quickly prepare smaller servings of slushies. YES! Just brilliant." It comes with 2x 3.2 gallon 12liter tanks and it's an incredible way to serve delicious slushies and frozen drinks to a large number of people. The Vevor Slushie Machine features a compact design and durable body. Its dispenser provides separate control for both panels and shows it on a digital screen. You can make 100 cups of slush in just 30 to 45 minutes. Under its every spigot there is a water junction to settle glasses or cups and to prevent drinks from overflowing. This excellent slushie machine by Vevor is more than perfect for hotels, convenience stores, commercial usage, schools, small parties, and other events. You can also make a large variety of drinks using frozen cocktails, granite drinks, fruit juices, cold coffee drinks, tea slushies and more. You can also mix two different flavors at a time. Conveniently it also features a spout to prevent any spill out. It's also not as noisy as other large slushy machines. All in all, it is a good slush machine that's worth every penny. It has a very unique aircooled compressor, its capacity is very large and can make up to 50 cups at a time. It features a durable body made out of highquality materials, it's also important to mention it's a great design. The Margarita Girl DoubleBowl Frozen Drink Machine features blades made of stainless steel to make it a perfect choice.

Its most desirable quality is that it keeps drinks cold as long as they remain in the tank. A large

spout is also helpful in preventing overflowing drink cups. Its most unique quality is the machine's high capacity and its powerful motor. It's also relatively compact and can be placed in any small cabinet in your kitchen. They may even love the margarita's more than the hosts at this point!" Elmeco is one of the leading brands for cold beverage dispensers specializing in Italian granita, slushies, sangrias and much more. Due to how "smart" the frozen drink machine is, it does not require periodic lubrication, seal replacements or any other annoying bits and bobs. Not to mention the 5year warranty that it comes with, this machine is a steal! The number one thing we loved most about the Bunn Ultra 2 is the drink thickness setting. Using the digital screen you can adjust the slush thickness for each one of the hoppers. This is absolutely perfect to give your guests multiple choices on their texture preference. The freezing time is pretty amazing, right. And lastly, we cannot forget the incredible capacity of the BUNN Ultra 2 Slush Machine, each side holds 3 gallons of mix, which results in about 50x eightounce drinks. The capacity is perfect for any party for up to 50 people. One thing that does come with that big of a drink capacity is the fact that the cleaning process will be slightly longer. From our experience, it took us about 15 minutes to completely clean out the entire slush machine, which isn't that bad. Get yourself the Bunn O Matic ULTRA 2, it's by far one of the best slushie machines out there. Not only is the production time fast and the machine very efficient, but it also produces an incredible end result. Does it get any better The 24L slushy machine is simple and convenient while offering very big tank capacities. Its highperformance second compressor boasts lowpressure consumption. Its drip trays are removable and easy to clean.

This is a highly dependable slush machine that can make instant frozen drinks for any party. Its large capacity can hold up to 24 liters of fluid and its chamber can hold two kinds of drinks. It also has a unique doublesided refrigerator which works much faster than refrigerators in other regular slushie machines. It is convenient for both home and commercial usage. You can make icy drinks, frozen cocktails, fruit juices, teas, coffees, and cappuccinos. Its two 12L tanks and a doublesided refrigeration system makes it the perfect choice and it will keep drinks ready for a long time. Had about 25 people each time and never ran out. I was a bit freaked out about the price but after using it and how easy it is to clean I am sold. " The machine has a refrigeration unit, so it creates the ice by itself. Although if you're not a big fan of cleaning, you might want to look at other options, as the Bravo Italia is not the easiest to clean. Made 1 gal frozen pina coladas in 1.25 hours, and 2 gal margaritas in 2.5 hours today. Did a fantastic job. Easy to start. Easy to use." It has a 10L tank capacity, it's perfect for making slushies at home or at larger gatherings. Usually, you get one free mix with each machine you rent. Amazon is also a great choice. Before you buy a slush machine, find the number of people you are going to serve. If you are buying it for personal use than the Little Snowie 2 type of machine would be enough. If you are buying for a social gathering then the Margarita Girl would be your best bet and if you are looking for a slush machine for a grand event go for the Slush machine with 2x 15L tanks. Will you be making slushies for your family or will you be using it to serve customers. If it's for your family then you need a machine that's small and handy, but if you need it for commercial purposes, go for one with high capacity and a durable motor machine. You also need to make sure you learn how to operate and how to use a slushy machine.

If you want to keep things as simple as possible, we recommend choosing a machine with a builtin cooling system. Some people only need to prepare slushy drinks, but others want to create tea slush, iced coffee drinks, slushie smoothies, and other icy deserts. Remember to choose according to your requirements and needs. If you're not sure what kind of slushies recipes to make, [click here](#) to read all our slushie recipes and a full guide on how to make a slushie. By understanding your requirements you'll be able to find a perfect slush machine for your business, restaurant or home. Allrecipes has more than 70 trusted slushy and slush recipes complete with ratings, reviews and mixing tips. Plus, I now know to freeze my surplus melon for use later. It makes a bright, refreshing little palate cleanser or dessert. Watermelon, ice, and a bit of lime juice are simply blended together in this quick treat. Top with whipped cream and caramel! This takes a while, but its worth it! Perfect

for hot weather. It is sooo delicious, I make it for almost every occasion! Sweetened tea is mixed with lemonade, orange juice and vodka or gin, then frozen into a slush. Its delicious even without the brandy! This was our attempt to recreate it.but we actually like it better than the original! To serve, mix with lemonlime soda. Just blend frozen watermelon, water, and lemonade drink mix, and serve.
