User manuals languages fr en de it es pt ru zh pdf functions. Select how Highlights include watches with splitseconds chronographs and hightech timepieces with smartwatch capabilities and distress signals. The company has enjoyed an exceptional reputation in this sector for decades. Its catalog includes the legendary Navitimer as well as hightech pieces with quartz movements and special functions. Many Breitling timepieces are designed to meet the demands of modern aviation. They can analyze flight data and send distress signals in case of emergency. That being said, the manufacturer ultimately stands for attractive and robust luxury watches, each with highquality technology and a consistent design. Diving watches from the Superocean and Avenger collections have long been winning over technologyoriented watch fans. The Superocean Heritage line includes vintageinspired pieces that are geared toward retrowatch enthusiasts.

Though it was first introduced in 2018, the Navitimer 8 also includes design elements inspired by historic watches. All in all, the Breitling catalog is made up of several collections composed of desirable retro watches as well as stateoftheart timepieces. Most of the watches are powered by mechanical movements. Since 1999, every movement has been certified by the Official Swiss Chronometer Testing Institute COSC. In 2009, the Grenchenbased company introduced their own caliber, the B01, with a chronograph function. One highlight is the Navitimer B03 Chronograph Rattrapante 45 with a splitseconds chronograph that was developed inhouse. This worldfamous pilots watch with chronograph functionality and a slide rule bezel first entered the market in 1952 and remains the Grenchenbased manufacturers most successful model to date. Current stainless steel versions with the inhouse B01 chronograph caliber cost around 6,300 USD new. Preowned pieces go for about 5,900 USD. This pilots watch has a 43mm case. The variant in 18karat rose gold costs around 15,000 new and almost 12,300 USD preowned. A preowned model comes in at about 5,700 USD. You can get one of the 45mm rattrapante chronographs with the inhouse caliber B03 for about 9,500 USD. The rose gold version with a splitseconds or rattrapante chronograph is significantly more expensive at over 30,700 USD. You can purchase one of these pieces for about 3,900 USD preowned and 4,200 USD in mint condition. The automatic Valjoux 7750 caliber ticks away in many of these models. For fans of vintage watches, early Navitimer models with the reference number 806 are particularly interesting. Those made of stainless steel are especially soughtafter and cost between 3,700 and 12,300 USD depending on their condition. The

manuallywound Venus 178 caliber powers most ref. 806 pieces. Watches with the Valjoux caliber 72 are extremely rare.

This movement is also wound by hand and was only used in the Navitimer for a short period of time in the mid1950s. Although this line bears the name of the famous Breitling pilots watch, these watches dont look like Navitimers at first glance. This is mostly due to the lack of a slide rule bezel, which enables the wearer to calculate distances, average speeds, and climb and descent rates. The Navitimer 8 has a bidirectional fluted bezel and is best suited for measuring periods of time thanks to its arrow markers. Even the 8 in the name has historic origins It comes from the Huit Aviation department founded by Willy Breitling in 1938. The Navitimer 8 has a maximum power reserve of 70 hours, or almost three days. Currently, this collection includes chronographs, world timers, versions with day and date displays, simple threehand editions with a date, and a 50mm model with three hands and a leftsided crown. The 50mm timepiece is inspired by the watches worn by bomber pilots during World War II. On Chrono24, you can find both editions for as little as 6,100 USD. The variant in 18karat rose gold costs around 18,400 USD new and comes with a brown crocodile leather strap. Chronographs featuring the Valjoux 7750, which Breitling calls caliber 13, are much less expensive. You can get one of these stopwatches starting at 4,400 USD. Threehand models with a date display at 6 oclock are even more affordable at 3,200 USD. The DayDate version is only slightly more expensive with prices starting at 3,300 USD. The Navitimer 8 B35 Automatic Unitime 43 with a world time function demands 6,500 USD with a leather strap and 6,800 USD with a steel bracelet. For example, the Avenger II Seawolf is water resistant to 3,000 m 300 bar, 9,843 ft and is quite massive with its 45mm diameter and height of 18.4 mm. Plan to spend a good 3,400 USD for a model in mint condition and 3,200 USD for a preowned piece.

The smallest version is water resistant to 200 m 20 bar, 656 ft and is more geared toward women. It costs around 3,100 USD new and 2,300 USD preowned. The largest edition is water resistant to 1,000 m 100 bar, 3281 ft and comes in at 2,900 USD preowned and 3,400 USD new. Set aside around 3,300 USD for the 42mm version in mint condition and 2,800 USD for a preowned model. These wristwatches are contemporary reinterpretations of earlier models from the 1950s. Some features of the current collection include fluted ceramic bezels, tapered indices, a swordshaped minute hand, and an arrowshaped hour hand. You can get a new, 46mm chronograph from this collection for 4,300 USD. A preowned piece costs just under 3,700 USD. Since 2018, 44mm chronographs with the B01 inhouse caliber are available; list prices start around 8,800 USD. If you prefer a cleaner dial, you should take a closer look at the retro threehand variants. The 42mm version with a braided steel bracelet goes for 3,400 USD new and 3,200 USD preowned. The threehand watch is also available as a 46mm model at prices around 3,200 USD. Top models in this line have chronograph and world time functions, making them perfect for frequent travelers. However, there are also classic watches with three hands and day and date displays. The cases of these dress watches come in stainless steel or 18karat red gold. For the band, you can choose between crocodile leather or braided steel. You can purchase a mintcondition, 43mm Transocean DayDate for as little as 4,300 USD. A neverworn red gold model costs about 13,800 USD. Preowned DayDate models are harder to find, making them only slightly less expensive. Preowned editions cost about 1,200 USD less. You can find the 46mm Transocean Chronograph Unitime with chronograph and world time functions for around 9,000 USD new and 7,400 USD preowned. Measuring between 44 and 50 mm in diameter and over 17 mm thick, these timepieces are best suited to larger arms and short sleeve shirts.

In the movie Die Hard with a Vengeance, John McClane, played by Bruce Willis, relies on the accuracy of a Chronomat. You will need to spend almost 6,200 USD for a new example of this 48mm watch. Preowned examples are markedly less expensive at around 4,500 USD. The 50mm Avenger Hurricane is constructed of lightweight black Breitlight, a material made up of composite fibers

developed by Breitling. It is significantly lighter than stainless steel and very scratchresistant. This timepiece costs about 7,400 USD new. Models in this price range include the inhouse caliber B01. Older versions with the Valjoux 7750 are much less expensive and cost as little as 2,500 USD preowned. If youre lucky, you may even find one for under 2,500 USD. This pilots watch, with its striking black dial, was originally introduced in 1952. Its scales enable a number of useful aviation calculations. For example, one can calculate speed, flight time, climb and descent rates, distance, and fuel consumption using the Navitimer. Its not just a watch, its a specialized aviation calculator. Today, modern cockpit instruments can also provide this information, but they cant replace the Navitimers charm. This automatic caliber has a chronograph function and can time periods of up to 12 hours. Its power reserve lasts for around 70 hours. The case is available in either 18karat rose gold or stainless steel. The standard version has a diameter of 43 mm, though 46mm and 48mm versions are also available. The Navitimer is water resistant to 30 m 3 bar, 98 ft. The Montbrillant is another pilots watch from Breitling which closely resembles the Navitimer and features a white dial as well as the same 01 caliber. This watch has helped save lives since 1995, thanks to its builtin distress call transmitter. It transmits a signal at the international frequency 121.5 MHz, which search planes can track in calm seas or over flat land from a distance of approximately 170 km 105 mi.

In 2003, two British crew members were saved thanks to their watches after their helicopter crashed in Antarctica. The Emergency II, the newest version of the watch available since 2013, can also transmit a distress signal at 406.04 MHz, which is monitored by satellites. These functions obviously require energy to operate. Therefore, the Emergency is outfitted with a battery that lasts about two and a half years. Its quartz movement, the Breitling 76, compensates for temperature fluctuations, which can cause inaccuracy. The time can be displayed in analog or digital fashion. Its case is made of black titanium and has a large diameter of 51 mm and a thickness of 21.6 mm. Without its band, the Emergency weighs 144 g. Its a classic diving watch with all the necessary features water resistance to 20 bar 200 m, 656 ft, a unidirectional bezel to keep track of dive times, luminous hands, and a fluorescent zero mark on its bezel. It also features a screwdown crown, which is protected from damage by a crown guard. The smallest version of the Superocean features a 36mm stainless steel case, while two larger versions measure in at 42 mm and 36 mm in diameter. Other versions of the watch can go to even deeper depths The Superocean II 42 is waterproof to 50 bar 500 m, 1,640 ft and is comparable to the Omega Seamaster Planet Ocean. Both diving watches are perfectly suited for deep diving. Even more sturdy is the Superocean Chronograph M2000, which can dive down to 2,000 m 6,562 ft. This timepiece is 46 mm in diameter and powered by a quartz movement. Watches in the Superocean collection usually use automatic calibers. The Avenger II Seawolf can withstand pressure to 300 bar 3,000 m, 9,843 ft, for example, and is powered by the automatic caliber Breitling 17. With a water resistance of 20 bar 200 m, 656 ft, the Superocean Heritage floats in the usual range of watches suitable for recreational divers. Its bezel is available in black, blue, or green, as well as rose gold.
