This information is called your TTI Transmit Terminal Identification and appears at the top of the faxed document in small type. You can select if the time information in your FAX changes to match your country's summer time system and set the day and time when the summer time begins and ends. The fax asks you to speak the party's name again. After a tone, speak into the microphone again. Before you can use the UCanTalk feature, you must register voice tags. You can register a name or phrase no longer than 3 seconds you want to use to retrieve the party, such as the first name, family name, nickname, company name, official position, and so forth. You can use regular copier paper, cotton bond paper, or typical letterhead. Your fax does not require special ink jet paper. Always use paper without curls, folds, staples, or damaged edges. Look at the label on the package to see if the paper has a preferred side for printing. You can make up to 99 copies of one document at a time. If you make copies of multiple documents at a time, the number of pages the fax can scan into memory varies depending on the scanning resolutions see p. Low resolutions may cause text and graphics to have a jagged appearance, while higher resolutions provide smoother curves and lines, crisp text and graphics, and a better match to traditional typeface designs. Regular dialling Onetouch speed dialling see p. In this case, the fax quickly scans the document into memory. Then it sends the document from memory. This means you do not have to wait for the fax to finish sending before you can retrieve your original document. You need to connect the handset or extension phone to the fax for manual sending. Load the document face up into the document tray. See Loading documents, p. This procedure can also be used to look up the other party's name and

retrieve the number for dialling. See Loading documents, p. 32. You can set the scanning resolution and the contrast see p. 51. <http://www.pirotechnica.ru/userfiles/husqvarna-137-manual.xml>

The caller history feature is only available in some countries. This section explains these two methods. This allows you to take advantage of lower late-night long-distance rates offered by some telephone companies. Load the document face up into the document tray. See Loading documents, p. 32. You can set the scanning resolution and contrast see p. The fax can only register one preset sending operation at a time. To send or copy other documents after setting the fax for delayed sending, simply send or copy using any other sending procedure in this guide. The fax prints the document. To determine which mode best suits your requirements, see the table below. If the caller wants to send a document after talking to you, ask them to press the start button on their fax machine. Your fax begins receiving the document. Cancelling receiving. When the fax number is called, the network sends a specific ringing tone which your fax recognises and automatically handles as a fax call. If the phone number is called, a different ringing tone is sent out from the network so that the call is handled as a voice call. If you subscribe to this service, your line is assigned two numbers one for fax and one for phone. When the fax number is called, the network sends a specific ringing tone which your fax recognises and automatically handles as a fax call. If the phone number is called, a different ringing tone is sent out from the network so that the call is handled as a voice call. Message played when any new telephone messages are forwarded to a forwarding number. FAXB140 only When you cancel TAM MODE, any new telephone messages will be played automatically. The recording time can be set to 0, 30, 60 or 120 seconds. To use this feature, LINE MONITOR VOL see p. 82 must be set to a setting other than 0. If LINE MONITOR VOL is set to 0, you will not be able to hear any incoming messages as they are being recorded. Use the microphone on the printer cover to record your voice memo.

If you record a new voice memo when there is already a voice memo recorded, the old voice memo will be deleted. The fax asks you to confirm that you want to delete the message. If a voice memo has been recorded, it will be played back first. You can also use the remote control features to set TAM MODE. You must register a four-digit PIN as your password before you can use these features see below. The outgoing message will be played. Enter your password when you hear the beeps indicating that you should enter your password. When your password is accepted, you will hear a confirmation tone a short series of beeps. The fax will now accept remote control commands see List of remote control commands, p. When TAM MODE has not been set, entering this command activates TAM MODE and ICM forwarding mode simultaneously. Setting ends and the fax returns to standby mode. If PIN ENTRY is set to OFF, it is not necessary to enter your password when you use the FORWARDING MSG feature see p. A call is received at the forwarding number. When you answer the phone you will hear your forwarding message. TX REPORT OUTPUT NO Turn off the activity report feature. OUTPUT YES Set the fax to print an activity report every time you send a document. PRINT ERROR ONLY Print only when an error occurs during sending. PRINTER SETTINGS Name RX REDUCTION FIXED REDUCTION. Set the date format. DATE SETUP Set the language of the LCD messages. DISPLAY LANGUAGE TX START SPEED Set the speed at which the fax starts transmitting. Set this to a lower speed if you have difficulties connecting over long distance or noisy lines. Set a four-digit PIN so that you can access the fax from remote locations. These operations can be printed out in the form of activity reports that can help you check the dates and times of fax transmissions and whether or not each transaction was successful. For automatic printing, see ACTIVITY REPORT, p. 83. Transactions in an activity report are listed chronologically.

You do not need to unplug the fax when clearing paper jams. Gently pull any jammed paper out of the fax as shown. Pull it gently in either direction. This section describes the necessary cleaning procedures for the fax. Since documents in memory are erased when the power is disconnected, print any documents stored in memory before disconnecting the power cord see p. Be sure to close

the printer cover until it locks into place. Reconnect the power cord. To maintain the best possible print quality, these nozzles need to be cleaned from time to time. Your fax is equipped with a print head cleaning function that does this. There may be other documents being sent from memory. ECM may be disabled. ECM may be disabled. The fax number dialed was incorrect. The other party's fax machine is not working. The other party is not using a G3 machine. The document is not set in the document tray. The size of the paper in the multipurpose tray and that specified in the PAPER SIZE setting are different. DATA ERROR An error has occurred and all onetouch speed dialling, coded speed dialling, and user data have been lost. DOC. TOO LONG The document is longer than 750 mm. ECM RX The fax is receiving a document using Error. The outgoing message has not been recorded. However, documents stored in the fax memory will be deleted. If a power failure occurs or the power is turned off, the fax will automatically print a memory clear report as soon as the power is turned on or the power is restored. However, you are not the only person having problems with keeping the operation manual of all household devices. Below are few guidelines regarding how and why you should collect the product manuals.

However, we believe that the manuals should include the most important and needed information about Sony FAXB140, not to discourage the user to read. Obviously, if a device Sony FAXB140 has multiple advanced functions, we will not avoid a high amount of information in this document. Then, it will be much easier to find it than look through the purchase boxes which have already been thrown away by you or any other of household members. It will be enough to clear the drawer once in a year and throw away any manuals of the devices you do not use anymore. Thus, you can avoid storing any unnecessary documents and keep only those which are valid. You can also download and print the manual Sony FAXB140 to place it in your drawer. Something went wrong.
