What I can tell you is that Dbx scored with this piece of gear. I think it sounds a lot better than the Alesis 3630 or the Behringer mdx 2600.more natural maybe because of the dbxs overeasiness function which is great for the beginner or if you are not very patient while tweaking threshold and ratio. Also the Auto function works out a very natural approach to attack and release. I use it for recording and Im very happy with it. Dual Stereo allows you to compress your whole stereo bus for that final oomph to your mix. Overall very happy with this unit.Please try again later. Please try again later. P. Carson 5.0 out of 5 stars Voice programming, not music. The fast acting limiter catches peaks that would overmodulate, while the slower compression function boosts the modulation index. Can see it on the scope. Hang time great, does not wheeze. Compatible levels for balanced lines. Hope they keep making this one for a while. It is totally transparent providing it is set correctly. The only drawback is that the power switch is on the back, not in the front. I have it installed in an enclosed portable rack and getting to the power switch is next to impossible. So I took a star away for that. If you are not mounting this or if it will be in an open rack it wont be an issue for you.
