## C48 carton dimensions

The packaging requirements for the tobacco boxes are as follows: each box consists of top and bottom pieces, with the label "top" on the top piece and "bottom" on the bottom piece. The carton has five internal layers, with a total thickness not less than 6 mm. The weight of the carton box should be at least 12.5 kg. The internal dimensions of the bottom piece are 1100 x 670 x 720 mm. The grammage (thickness) of each layer is specified as follows: outer layer (kraft) - at least 400 gr/sqm, medium layer - at least 400 gr/sqm, inner layer - at least 400 gr/sqm, flute B - at least 150 gr/sqm, and flute C - at least 150 gr/sqm. Each box comes with two cardboard sheets, measuring 900 mm in length and 500 mm in width. The packing requirements specify that five boxes should be stacked on top of each other during storage, which will expose each box to high pressure during the pressing process. Each box must be used at least twice. The supplier is responsible for providing general conditions such as temperature and humidity when using durable packaging material. This not only ensures safe transportation but also grabs customers' attention. Suneco Box, a professional manufacturer in China, offers customized corrugated boxes with short production periods and accurate delivery times. Their high-tech machinery, innovative designs, and state-of-the-art print capabilities provide top-notch brand promotion while protecting products during storage, transit, and display. The tobacco boxes perform dual functions - protecting product freshness while upholding legal specifications and providing appealing consumer attractions. Each layer combination must maintain a total thickness exceeding 6 mm to ensure the carton's security functions are met. The Tobacco Boxes weight must exceed 12.5 kilos. The dimensions of the bottom piece should be 1100 x 670 x 720 mm. Each layer of the carton must have a minimum weight of 400 gr/sqm, except for Flute B which requires at least 150 gr/sqm. The carton boxes must contain a minimum of 150 gr/sqm of Flute C. The packaging includes two cardboard sheets measuring 900 x 500 mm. Each packing box weighs 200 kg and must withstand high pressure during the press process. They should be stacked with at least five boxes on top of each other. The supplier should deliver general storage requirements concerning temperature and humidity conditions. Our company, Walls, operates as a professional manufacturer in Dubai, UAE, providing customized corrugated boxes for various products. We have expertise in producing high-quality cartons using advanced technology equipment, creative designing, and leading-edge printing. Our company maintains a professional international trade department alongside technical development engineers and a design team to provide top-notch customer service. We will provide exact pricing after a short delay. We have received inquiries from customers interested in ordering 20,000 pieces of Corrugated C48 Carton boxes for Tobacco shipping packaging. We are seeking your quotations for the supply of 120,000 C-48 boxes in Tanzania on CIF Dar Es Salaam basis. The required technical specifications for these carton boxes include: 1. Each box consists of two pieces (top and bottom), with specific labeling. 2. Five internal layers, each with a minimum thickness requirement. 3. A weight of at least 12.5 kg per box. 4. Specific grammage requirements for the various layers. 5. Two cardboard sheets per box, with specified dimensions. 6. The boxes should be capable of holding 200 kg of tobacco, without deformation during stacking and pressing. The supplier must guarantee the strength and durability of these carton boxes, considering their repeated use in storage conditions involving high pressure. Additionally, please provide technical leaflets outlining recommended storage conditions (temperature, humidity). As a reliable supplier of C48 carton boxes, Suneco Box has previously supplied to Syria, Dubai, and African countries. The advantages of using C48 carton boxes for tobacco products include their durability, lightweight design, customizability, and cost-effectiveness. We're aiming to trim down costs without compromising quality. One way to do this is by using eco-friendly packaging materials, like recyclable C48 carton boxes. These boxes are not just good for the environment; they're also super durable and can be customized to fit your needs. When it comes to buying C48 carton boxes, you've got a few options: you could hit up local or online suppliers who specialize in tobacco packaging, try an online retailer like Amazon or Uline, or go with a company that's specifically geared towards the tobacco industry. Just make sure whoever you choose meets all the necessary regulations. The C48 carton box is basically the gold standard for packing cut rag tobacco. It's designed to be both strong and cost-effective, making it perfect for shipping and storing tobacco over long distances. With its standardized size and reinforced structure, this box is like a safety net for your precious cargo - it keeps everything safe from damage or contamination during transit. The C48 carton box comes in some pretty specific specs: \* External dimensions: 1133 x 700 x 759 mm \* Internal dimensions: 1093 x 660 x 719 mm \* Weight capacity: Can handle up to 100-115 kg of cut rag tobacco \* Stacking capability: Optimized for a 1+4 stacking height, which is super efficient for warehouse and storage space These features make the C48 carton box a top pick for manufacturers and suppliers in the tobacco industry. Its size and strength are perfect for safe transportation of big volumes of tobacco, and its standardized dimensions mean it's compatible with all sorts of automated machinery used in factories. The C48 tobacco carton box is a real MVP - it's durable, strong, and customizable. Whether you're looking to reduce costs or just want the best packaging solution for your cut rag tobacco, this box is the way to go! When choosing a carton for tobacco products, manufacturers look for something with the perfect balance of strength and lightness. This is particularly crucial in an industry where huge volumes need to be shipped without getting crushed or damaged. One of the key benefits of the C48 carton lies in its stackability - it can be stacked 1+4, which means one box at the bottom and four on top. This not only saves space but also makes logistics easier. The C48 carton is versatile, designed primarily for tobacco but also suitable for a wide range of bulk goods that require careful handling and secure packaging. Its corrugated structure offers excellent protection against moisture and dust, which is essential for maintaining the quality of tobacco during storage and transport. Plus, it can be customized to meet specific needs - from using different types of corrugation to printing company logos or product information. In terms of dimensions, the C48 box has standard measurements that make it ideal for the tobacco industry. It's spacious enough (1133 x 700 x 759 mm) to accommodate large quantities of cut rag tobacco, and its internal volume is optimized to ensure that tobacco can be packed safely without being crushed or damaged. These dimensions are carefully crafted to allow for stacking while maintaining stability. So, why do manufacturers choose the C48 carton? It's cost-effective, made from corrugated cardboard which keeps manufacturing costs down. Despite being inexpensive, it doesn't compromise on quality or performance. Plus, it's a global standard recognized worldwide as the go-to solution for tobacco packaging, making it easier to streamline logistics processes. And, with its recyclable material, manufacturers can feel good about their environmental footprint too. C48 Carton Boxes: Versatile Packaging Solutions for Tobacco Manufacturers A packaging solution beyond tobacco, C48 carton boxes can be repurposed for other industries or products, adding value to their use. China is a major hub for C48 box manufacturing, offering high-quality solutions that meet global standards. Key Features of Chinese Suppliers: - Custom printing and design for branding and product information - Bulk purchasing options for competitive pricing - International shipping with door-to-door delivery Corrugated vs Traditional Carton Boxes: C48 boxes have a fluted paper layer providing strength, durability, and insulation. This structure enhances protection during transport, while reducing shipping costs. Pricing: The C48 box price ranges from \$0.1 to \$0.46 per piece, with bulk purchases offering competitive pricing and customization options. China's suppliers cater to large-scale tobacco manufacturers, making it an attractive option for sourcing packaging materials. The C48 Carton Box: A Top Choice for Tobacco Industry Needs C48 Carton Box: A Viable Solution for Tobacco Companies The C48 carton box, specifically designed for the tobacco industry, offers a unique combination of dimensions and stacking capabilities that enhance efficiency in storage and transportation. With internal space to accommodate 100-115 kg of cut rag tobacco, this box is ideal for large-scale packaging. Manufacturers from China, a major producer of C48 boxes, provide high-quality products at competitive prices. These manufacturers utilize advanced technology and cost-efficient processes to create corrugated cardboard packaging that meets global standards. Customizable options include variations in corrugation layers and exterior printing for branding purposes. Key features offered by Chinese manufacturers include custom printing, bulk purchasing, international shipping, and competitive pricing. On average, C48 boxes are priced between \$0.1 and \$0.46 per piece, with larger orders often eligible for bulk discounts. The benefits of choosing C48 carton boxes lie in their cost-effectiveness, standardization, and sustainability. As a cost-effective solution, the corrugated cardboard used is strong yet economical. Standardization simplifies logistics and transportation processes, while sustainability ensures recyclability, aligning with the growing demand for environmentally friendly packaging solutions. Sturdy and versatile packaging solutions for various industries, with a focus on tobacco products. The C48 carton box is an essential choice due to its durability, cost-efficiency, and adaptability. Its standardized dimensions make it ideal for manufacturers worldwide, while competitive pricing from Chinese manufacturers keeps costs down. Jayaraj Fortune specializes in manufacturing high-strength boxes suitable for harsh climatic conditions, using rust-proof stitching wire and water-resistant adhesives. The C48 box is a global standard for tobacco packaging, with different qualities based on purpose. Typically used to pack 200Kg produce stacked 5-6 boxes high. Other types of sturdy boxes include Gaylord Bulk Bins or Jumbo Baskets, often made from 7-ply or high-strength 5-ply corrugated boards and designed for large-volume material packing. We specialize in custom packaging solutions for various industries, such as farmer packing for pumpkins, watermelons, and cucumbers, as well as loose packing for automotive components like bearings. Our unique selling proposition (USP) lies in crafting single-piece Gaylord boxes with only one joint, eliminating the need to store and assemble separate lids. We also offer a convenient 1 cubic meter volume Gaylord box that includes both top and bottom flaps, streamlining inventory management and point-of-use assembly.
