Screenshotting and zooming into the eye was the man behind the screen. Watching you, like a predator catching one of its prey. Biting any moment. I never had thought this app would be scary for my daughter to use. Until, stepping upon my own research. Keep this app away from children. Don't let him drive your children into his den. Take this as granted and not a grain of salt. Please and thank you.1.241 people found this review helpfulDid you find this helpful? Flag inappropriateShow review history! like this game it helps me with my anxiety and stress but I wish she could have the chat thing again I want it to be back installed @but at the same time you can say inappropriate stuff on there and her voice is just creepy when she talks on the chat so this game is more creepy because there have been more complaints of this if you don't know what I'm trying to say I'm saying that if you go on YouTube and search is someone in Angela's left eye yes there is it's a hacker so stop playing!!!!!!225 people found this review helpfulDid you find this helpful?Bug fixes and minor gameplay improvements.flagFlag as inappropriate The Talking Angela game series represents a significant evolution in the realm of virtual pet games, combining interactive gameplay with captivating narratives. FAQ Section Talking Angela games are available on various HTML5 platforms, allowing for instant play on both desktop and mobile devices. Yes, players can enjoy Talking Angela games for free, with no downloads required. The series includes a variety of mini-games such as dance games, beauty salon simulations, jewelry design, and kung fu training. Most of us like taking care of creatures we love. Usually those are pets, which we feed, surround with care and love, and finally we feel the true affection to those. They bring lots of joy to our hearts, and when we feel despaired and exhausted, everything we need to do is to spend a little time with them. But if we have not enough time or patience to pet real animals, there's always a solution – games. They help us distract from what bothers us at the moment, and My Talking Angela games are a great chance to relax and have pleasures with minimum expenses. What does it offer to us? My Talking Angela is a collection of releases devoted to taking care of a kitten. But the thing is here it's not just a kitten – she's just like a human. With feelings, personal need for emotions, stages of growing up and so on. So our task is to make her happy, just like she is a player's daughter. Angela needs to discover the world, as she is a girl, she is interested in fashion and of course she needs your help in dressing up, wearing makeup and making friends. And finally, she's not just a little girl – she becomes a woman once, and as any 'parent' – at some moment you need to let her go. Help her make arrangements for the wedding and everything to make her life complete. Are these the only options available? Actually no. As there's a series of games, you can always find something to your taste. If you want to have some new experience with the new talking pets, or have another environment to play in – there are many variations to choose from. Even the game My Talking Angela, not including the mods with other characters as protagonists, has so many variations that it will probably make you a little frustrated at first. So start your marvellous experience with one of the most cute and variable games in the category of taking care releases! Chatterbot mobile game created by Outfit7 2012 video gameTalking AngelaLogo for Talking Angela used from 13 January 2014 until 24 March 2021Developer(s)Outfit7Publisher(s)Outfit7SeriesTalking Tom & FriendsPlatform(s)iOS, Android, Windows1] (formerly)ReleaseiOS: 18 December 2012Android: 11 January 2013Windows: 1 August 2015Genre(s)Entertainment • Virtual pet • Chatbot2]Mode(s)Single-player Talking Angela is a mobile game (formerly a chatterbot), developed by Slovenian studio Outfit7 as part of the Talking Tom & Friends series. It was released on 13 November 2012 and December 2012 for iPhone, iPod and iPad, January 2013 for Android, and January 2014 for Google Play.[3] The game's successor, the My Talking Angela game, was released in December 2014. In February 2014, Talking Angela was the subject of an Internet hoax alleging that the application encouraged children to disclose personal information about themselves, which is ostensibly then used by pedophiles to identify the location of these children. The rumor, which was widely circulated on Facebook and various websites claiming to be dedicated to parenting, claims that Angela, the game's main character, asks the game's user for private personal information using the game's text-chat feature.[4] Other versions of the rumor even attribute the disappearance of a child to the game.[5] or claim that it is run by a paedophile ring, while some go so far as to even claim that the user is recorded by the camera and can be seen in Angela's eyes.[6] It was debunked by Snopes.com soon afterwards. The site's owners, Barbara and David Mikkelson, reported that they had tried to "prompt" it to give responses asking for private information but were unsuccessful, even when asking it explicitly sexual questions.[4] While it is true that, in the game with child mode off, Angela does ask for the user's name, age and personal preferences to determine conversation topics, Outfit7 has said that this information is all "anonymized" and all personal information is removed from it. It is also impossible for a person to take control of what Angela says in the game, since the game is based on chat bot software.[7] In 2015, the hoax was revived again on Facebook, prompting online security company Sophos and The Guardian to debunk it again.[8] Sophos employee Paul Ducklin wrote on the company's blog that the message being posted on Facebook promoting the hoax was "close to 600 rambling, repetitious words, despite claiming at the start that it didn't have words to describe the situation. It's ill-written, and borders on being illiterate and incomprehensible."[9] Bruce Wilcox, one of the game's programmers, has attributed the hoax's popularity to the fact that the chatbot program in Talking Angela is so realistic.[10] However, genuine concern has been raised that the game's child mode may be too easy for children to turn off, which, if they did, would allow them to purchase "coins", which can be used as currency in the game, via iTunes.[11] Disabling child mode also enables the chat feature, which, while it is not "connecting your children to paedophiles", still raises concerns as well, according to Stuart Dredge, a journalist from The Guardian. Dredge wrote that in chat mode, Angela asks for information such as the user's name.[8] The scare has significantly boosted the game's popularity, and is credited with helping the app make it into the top 10 free iPhone apps soon after the hoax became widely known in February 2015.[12] and 3rd most popular for all iPhone apps at the start of the following month.[10] In 2016, Outfit7 removed the chat feature along with the camera function from the app due to this controversy:[13] Talking Tom & Friends My Talking Tom ^ "Talking Angela app on Microsoft Store". PolitiFact. Archived from the original on 19 July 2024. Retrieved 21 June 2022. It seems that now the app doesn't have a chatting option at all, regardless of the users' age. A Change.org petition from 2017 complains that even though rumors about the app were false, the option for adults to chat with Angela was removed. Retrieved from " This week, a year-old hoax about the Talking Angela app being dangerous for children has been doing the rounds on Facebook again, despite having been debunked back then, and again now.Parents can be forgiven for being spooked by the suggestion that a cutesy talking cat app is actually a front for a paedophile ring, as one of the hoax messages claimed. So what is Talking Angela really saying to your children, and is it inappropriate? The best way to find out is to actually use the app.I've spent an hour in her company today doing just that. In short; yes, the hoax is a hoax. But the app's developer Outfit7 could be doing more to ensure parents feel at ease with their children using the app.Some facts first: Talking Angela is part of a wider series of apps called Talking Tom and Friends, which have been downloaded more than 1.5bn times since 2010, and are currently being used by 230m people every month – lots of children, but also lots of adults.They've spawned a series of popular YouTube videos in partnership with Disney, as well as a range of physical toys. Outfit7 is a well-known apps company, not a shadowy network of child-catchers, in other words: I've interviewed the firm in March 2011, March 2012 and June 2013 tracking the rise of its apps.Below, you can find out how Talking Angela really works – with screenshots – to help you make an informed decision about whether it's suitable for your children.Talking Angela has a child mode, but it's too easy to turn off. Photograph: PRTText-chatting with AngelaFinally, what happens if you turn child mode off – as any child can relatively easily – and start chatting to Angela using the text box at the bottom of the screen? It's this feature that's fuelled the Facebook hoax.While it's definitely not connecting your children to paedophiles, and does raise some issues. These are all genuine questions that Angela asked me while I chatted to her:"How long have you been friends with your best friend?" "I've met my best friends at school. Where did you meet yours?" "What will you do today?" "I'd like to be your friend. What's your name?" "I'm 18. How old are you?" "What do you do with your friends for fun?" "And yes, Angela does ask at one point "You know what's fun too? A clothing swap party. Have you ever been to such a party?" before segueing into an anecdote about how she swapped clothes with her virtual boyfriend Tom for japes.It ends innocently – "Friends ROFLed and everybody at the party cheered at us. It was a cool night!" – but taken out of context with some of the questions above, it's no surprise that parents are spooked. She'll even tell you that "cat sex is hair raising. It's purrfect" if you ask her about, well, cat sex. As some children surely will.The point: children aren't meant to be using Talking Angela's text-chat feature, yet the app's developer hasn't taken any meaningful measures to prevent them from simply toggling the child mode off. There's not even the "swipe down with two fingers" or "write this sequence of numbers as figures" parental gate that's become common in children's apps in recent months.The text-chat in Talking Angela isn't aimed at children. Photograph: PRThis is the main thing to understand about Talking Angela: it's an app aimed at children and adults alike, including text-chat that would seem cheeky and silly for the latter, but inappropriate for the former. The problem is the lack of a strong-enough barrier between the two modes.When it comes down to it, your children are still going to be chatting to and sticking their tongues out at a cartoon cat, not falling into the clutches of the "PEDO RING" [sic] that's been mentioned on Facebook.A couple of commenters on my previous article about the Talking Angela hoax suggested concerns about the app normalising the kind of conversations that you wouldn't want children having with strangers in the real world. That's a legitimate criticism, and one that Outfit7 should act on by making it harder for kids to turn off the Child Mode.But the hoax is a reminder that as parents, we also have responsibilities to be aware of what apps our kids are using and how they work – from first-hand experience. For now, I would steer my children to other apps rather than Talking Angela, but that's based on testing it out for myself, rather than believing hysterical ALL-CAPS warnings posted on Facebook.
