Looking for the best free Quest games and apps? Here are our top recommendations.Four years after the original Oculus Quest headset arrived, the Meta Quest platform offers an impressive range of experiences that caters to all interests. However, that won't go far if you're someone who's just bought a Quest 2, Quest Pro or Quest 3 and doesn't have much budget left for paid games and apps. That's where we come in.You can find many free experiences across the officialQuest Storehere. Some are hidden away on App Lab, Meta's experimental platform that avoids the strict curation policy but significantly reduces discoverability. As such, we recommend searching through SideQuest or the App Lab game list if you're keen to find more. While we've excluded them from our list to avoid any confusion with the full games, the Quest store includes numerous demos and free trials worth considering. That includes Beat Saber, Superhot VR, Pistol Whip, Battle Talent, Ancient Dungeon, Space Salvage, The Under Presents, Divine Duel, Journey of the Gods, Creed: Rise To Glory and Space Piracy Trainer. It's important to note that this isn't a ranked list. You can realistically compare VR concerts to a hero shooter and our aim is to highlight experiences that cover all bases. Though we're separating social VR platforms from this list, we're giving VRChat, Rec Room, Roblox and Meta Horizon Worlds honorable mentions. With that out of the way, let's jump into our recommendations for the best free Quest games and apps.Population: OneVR does Fortnite right in this superb free-to-play battle royale shooter.Population: Onetakles place on a huge map in which teams of three battle it out to be the last ones standing. It can be intense, so we certainly don't recommend it as your first VR experience. Still, there's a rock-solid shooter with some great VR mechanics too, like scaling up walls with your hands or holding your arms out to glide when you leap off the side of a building. Crossplay support means you can play with friends using other headsets.Read More: Population: One ReviewBlastonDeveloped by Resolution Games, Blaston is a fast-paced free-to-play arcade shooter.
