Matching test maker

Enter your words and their match in the form lines below OR choose a premade word list (just below the instructions box). Click the large green "Generate Word Search" button near the bottom of the form to make your free custom puzzle quickly! Main FAQ's/Troubleshooting Title Write the letter of the correct match next to each problem. Instructions These Match-Ups were created here! Ads Blocked: That's OK! You are viewing a 'AD-Free' version of our site that has limited functionality You will get a MUCH IMPROVED application by simply allowing our advertisements to show! If you are completely against ads, we do have a fee supported site that contains no ads, and also offers a few extras over our ad supported site! BEFORE purchasing anything or leaving the site, may we suggest turning off your ad blocker and make 1 worksheet just see what you're missing by trying the ad supported version - we think you'll find it is well worth it! If not, we understand and thank you for giving us a try! (How do I turn off my Adblocker?) FAQ's and Troubleshooting Quick Instructions: Enter a Title and Instructions to print on your worksheet. On the first row, enter a correctly matched pair. (We will do the shuffling for you) Second row, enter another correctly matched pair. Repeat for as many as you like up to 100. Press "Generate Match-up Worksheet" button. Images not printing We have only verified that this works in Internet Explorer 6 and 7. It does NOT work in Firefox. Be sure that you have 'Print background images and colors' in your browser settings. If your image is too large, browsers cannot open it and it will not show up. Must be the correct type of image. Only jpg, jpeg, png, and gif images are fully supported. If it is a .bmp or .tif, you must convert it to a supported file type. Firefox will not print images from your computer on a remote website without changing browser configuration files. Therefore we do not support Firefox. Can I make a PDF and store this on my computer? Yes. Please see the "How to make a PDF" button on the generated puzzle page. The provided method will create best available reproduction of beautiful/complex puzzles like our puzzle maker creates. Can I save this as a Microsoft Word document? Although we do not make a word document for you to download, we have found that if you can highlight the entire page with your mouse, then copy and paste into a new word document - it will retain the table structure and data. This may take some experimentation, but it worked for us with IE7 and Firefox. Can I put this worksheet on my website? Can I put this worksheet in my book? etc. No. Please read our Terms of Use. In general, you are allowed to make copies for classroom or home use only, provided you do not remove the citation on the copies. Any other uses are forbidden without express written consent of The Teacher's Corner HEY!! Problems with one of our lists? Let us know which one is causing problems in the comments box below. A matching quiz is an objective assessment form widely used by different fields. It usually consists of 2 columns wherein the candidates connect column A to column B. Matching quizzes are perfectly made for recognition assessment and recall. Examinees can train their lower-order thinking skills, including comprehension, remembering, and knowledge. If the matching questions are well-crafted, it can also cater to the students' higher-order thinking skills. This form of assessment can provide various advantages to the exam administrator. It can help the administrator to diagnose the examinees' level of understanding about a specific topic. Table of Contents Matching quizzes assist professionals and educators to further improve and develop themselves, especially in terms of delivering a new set of skills and knowledge. It also provides all the necessary information to know which specific skill and knowledge must be attained and adapted. Matching quizzes are versatile since they can be used in various topics. They can also contain multiple questions wherein candidates must think about their answers, which prevents them from wild guessing their answers. An interactive matching quiz also provides engagement and fun for the students, allowing them to retain all the information obtained during the discussions effectively. Some of the uses of matching quizzes are as follows: Terms and Definitions Matching quizzes can be a perfect fit for remembering terms and definitions. This will allow the candidates to reflect and remember all the essential terms used within a specific field easily. By administering a matching quiz containing terms and definitions, you can also determine the candidate's understanding of particular terms. Order of Operations Using matching quizzes for the order of operations allows the candidates to remember the sequencing of processes used in a specific field. The result of this form of assessment can tell you whether a candidate can perform a skill-based task or not. Given that the matching quiz is a written form of check, using it for the order of operations will also require the candidates to use their psychomotor skills. Element Symbol Match Element symbol match is another use for matching quizzes. Just like in terms and definitions, this assessment form allows the candidates to think and remember the important symbols used in a specific field. For example, in electrical engineering, candidates must be well aware of the various symbols used to avoid miscommunication, especially if they are dealing with the blueprint of a building. By checking their level of understanding regarding the element symbols, you can ensure that candidates can effectively use these symbols appropriately. Scenarios and Responses Another use of a matching quiz is providing scenarios and responses that require the candidates to think of the appropriate response to a specific scenario; by giving them why and how questions, candidates can put themselves into the position of the person described in the question. This will enhance the candidate's affective and psychomotor domains of learning. How To Choose the Best Matching Quiz Makers? Multiple matching quiz creating tools are available online, so how will you select the best? Here are some factors that you must consider when choosing a quiz making software: Accessibility Accessibility is one of the vital factors when choosing a matching quiz maker. Choosing an accessible platform may result in easier data gathering and will provide flexible options among your users. You also must make sure that it can be accessed through various devices. Some quiz-making software is only available on computers, which makes it time-consuming for the respondents to answer. Security Another factor that you must investigate is the security feature of your chosen quiz-making software. You must ensure that the software you're about to use can store all data gathered safely. This will protect all confidential information about you and your professionals. User Interface You must consider the user interface when selecting a matching quiz maker. Check if the platform uses labels and instructions that are easy to comprehend. An interactive and user-friendly interface allows users to navigate the platform quickly and avoids miscommunication between the quiz administrator and the examinees. Customization Personalization and customization provide the sensation of ownership. If the users can customize their accounts, it can give positive reinforcement and encourage them to answer all the tasks and quizzes given to them. Pricing Lastly, when choosing a matching quiz software, consider its cost. Check whether the cost required to implement such a platform in your workspace is affordable. If you think the price doesn't equal the number of features the software offers, try looking for a more suitable application for your institution. 8 Best Matching Quiz Makers Comparison Chart Software Rating Question Types AI Technologies Pricing Free Trial OnlineExamMaker G2, 4.5/5 10 AI proctoring, intelligent reports, AI retake wrong questions \$17/month Signup Free eSkill Capterra, 4.5/5 8 AI anti-cheating Custom pricing Signup Free Cloud Assess Capterra, 4.7/5 6 Some \$50/month Signup Free Quizizz Capterra, 4.8/5 11 AI quiz creator \$50/month Signup Free Top Hat Capterra, 3.8/5 14 No \$53/year Free Demo ProProfs G2, 4.4/5 12 AI question generator \$20/month Signup Free ExamOnline G2, 5.0/5 10 AI exam monitoring Custom pricing Signup Free Digixam G2, 4.5/5 6 AI screen freezing Custom pricing Signup Free 8 Best Matching Quiz Makers to Create Online Assessments 1. Incorporating such excellent technology into your teaching won't be a waste of time; it will give you more time! Tips to Create Interesting Matching Questions and Answers Creating an engaging matching quiz involves balancing clarity with creativity. Here are some creative tips you can follow. Keep it thematically cohesive Choose a clear theme for the set of questions and answers. Whether you're matching historical figures to events, definitions to terms, or countries to capitals, ensure the theme is easily recognizable. Use asymmetry Ensure the number of items in the two columns is uneven. For example, if one column has 10 items, make the other have 12, so students can't just guess the final match. Incorporate puzzles Sometimes, you can create a mini-riddle in the question and match it to an answer. For example, match "It rings but you don't answer it" to "Alarm clock." Inject humor Use playful or humorous options occasionally in the answer column. This keeps the quiz light-hearted and engaging. For instance, in a history quiz, if one answer is an obvious joke (e.g., "Who invented the telephone? – Batman"), it adds a fun element but doesn't take away from the serious nature. Shuffle and randomize Randomize the order of the answers so that they are not in an obvious sequence. If you're matching terms with their definitions, make sure the definitions are listed in a different, randomized order. Matching Quiz Maker Software FAQ What is matching quiz maker software? Matching quiz maker software is a tool to create, customize, and proctor matching quizzes. It lets users develop assessments with different question types, set timers, and immediate assessment results! How does matching quiz creating software work?
