Answer: Monkey see monkey do What tastes better than it smells? Answer: A tongue Sometimes the most obvious riddles are the best ones. Before Mt. Everest was discovered, what was the tallest mountain in the world? Answer: Everest It just wasn't discovered yet Why make your team laugh? It's a great way to build camaraderie and improve morale. Here are some more easy riddles for adults: Contrary to my name, I am not a queen - hold me up to things though and their length is seen. Answer: Ruler This riddle involves wordplay, but the answer is pretty straightforward. What belongs to you, but everyone else uses it? Answer: Your Name Think conceptually to solve this one. 1. A stamp can travel around the world while staying in a corner. 2. Breath is light as a feather but even the strongest person cannot hold it for more than 5 minutes. 3. An echo speaks without a mouth and hears without ears, coming alive with wind. 4. A candle's life is measured in hours, and it serves by expiring; it's quick when thin and slow when fat, with the wind as its enemy. 5. Water is often running yet has no legs and needs humans but doesn't need them back. 6. The letter R is seen in the middle of March and April but can't be seen at the beginning or end of either month. 7. Pencil lead comes from a mine and gets surrounded by wood, used by everyone. 8. Home belongs to both itself and its occupant. 9. Redemption is the slayer of regrets, found by few but sought by many. 10. Live spelled forwards is what you do every day, but spelled backwards becomes something you hate. 11. French chefs make people love them by buttering them up. 12. Two Italian ants are called Romance. They say love makes fools of people! But what did the paper clip say to the magnet? "I find you very attractive." This might be an instant click for sciency types, making it a great love riddle. Other good love riddles include: What do snakes give each other when they say goodbye? A little hiss on the cheek. And why did the banker break up with his girlfriend? He was losing interest. Word Riddles are all about paying attention to semantics and every syllable of the question. For example, what has 18 legs and catches flies? A Baseball Team! This one involves America's favorite pastime. What has 13 hearts but no other organs? A deck of cards! This riddle might stump a few people in the office. Hyper-literal word riddles include: What word contains all of the twenty-six letters? Alphabet! And what has many words but never speaks? A book! Math Riddles are designed to test your wits in precision. For example, what did the triangle say to the circle? "You're pointless." While it's a good math riddle, it also checks off requirements for at least a light laugh. Other math riddles include: What is the smallest number that increases by 12 when it is flipped and turned upside down? 86. When it is turned upside down and flipped, it becomes 98, which is 12 more than 86. And I am a three digit number. My tens digit is five more than my ones digit. My hundreds digit is eight less than my tens digit. What number am I? 194. You can also try to find a set of three different whole numbers whose sum is equal to their total when multiplied. The answer is: 1, 2, and 3. Given text here 45 My twin lives at the reverse of my house number The difference between our house numbers ends in two What are the lowest possible numbers of our house numbers Answer The lowest possible numbers for the houses are 19 and 91 The difference is 72 Why this is a good math riddle Because this math riddle is outright tricky 1. I become even when given the number seven, removing the "S" A grandfather has two fathers, which can be his father or his grandfather's father - three generations: grandfather, father, and grandson. In order to find one heavier ball out of eight balls using a balance scale in just two weighings, divide into groups of three and compare their weights. If they are balanced, the last group is the heavy ball; otherwise, one more weighing finds it. The sequence starts with 2, then each number is the sum of the previous plus the next prime - the pattern continues until we reach 33. Next, when you add five to nine, get two; however, this occurs because of time changes at 9 o'clock. Additionally, the next number in the described sequence 1, 11, 21, 1211, 111221 is obtained by describing the digits of the previous term. For instance, if we go from one hundred twenty-one to eleven, we describe that as 'one 2 1' - this is how each new digit is formed. Next, three numbers give the same result when multiplied and added together: 1, 2, and 3. Later, two coins totaling thirty cents are identified as a quarter and a nickel (the coin not being a nickel is the quarter). A photo of the husband was taken by the woman, using a photography "shooting" instead of an actual shooting. Next, we find that the answer to what can run but never walks has a mouth, head, bed, or anything but sleep is indeed a river. In addition, a bottle fits the description: it has a neck with no head and wears a cap but does not have a face. Lastly, "ton" spelled backwards remains "not heavy", as does a joke which can be cracked, told, and played. "A clock has hands that cannot clap" or wear faces. Next, by looking at the painting in the museum, we see the man's son - this is due to him being his father's son's father. 1. You have two hourglasses, a 4-minute and a 7-minute timer. How do you measure exactly 9 minutes? Start both hourglasses. When the 4-minute runs out, flip it. When the 7-minute runs out, flip it. When the 4-minute runs out again, 9 minutes have passed. 2.
