

I'm human

This prefix generally means "before". Some words that include it are predict, prepare, preheat. See the full list below for more examples. However, if you want to view all 1,000 entries at once, they're available for free here. For a complete and up-to-date list, which also includes the option of purchase for €5, you can click on the "Purchase full list" button. The text provided is an extensive list of words related to various concepts, including prefixes and suffixes used in the English language. The words are a mix of scientific, medical, and general terms that demonstrate a range of meanings and applications. Among these terms, one can find references to anatomy (prefrontal, premaxillary), psychology (pre-frontal), medicine (pregenital, premalignancy), philosophy (preformationist, predestinationism), and even culture (preppy). The variety of words listed suggests a broad scope of interests or areas of study. Some terms are related to concepts that were prominent in the past (prehistorian) but still have relevance today, while others refer to conditions or states of being (preadolescent, premenopausal). The inclusion of words like "precociousness" and "predestinarianism" indicates a curiosity about human development, morality, and potential outcomes. The text also contains references to scientific concepts such as "preecho," which pertains to sound waves or signals in physics, and terms related to biology, including "pregenital," which could relate to early stages of life or development. Some words have specific applications in various fields, like "preplanned" for medical procedures or "prescription" for pharmaceuticals. The sheer breadth and depth of the list suggest a comprehensive approach to understanding language and concepts across multiple disciplines. The inclusion of prefixes that indicate before or prior (like "pre-" itself) underscores the interest in examining foundational or introductory aspects of these subjects. preloacal predisposal prerational prerevolutionary precognitive presbyopia presbyterial presbycusis preromantic precolonial presentability presentative preservable preservational precompetitive presider precompile presentable presolar pressbox presternum pressable presubmission preconcerted prestudy presuppositional press-up prev preventability preconsonantal preventional preventible preconstructed prevocalic prevision precovery precoordination precordium preweighed prewash predacity predatorily predefinition prewarn predatory predeterminable predicability predictiveness The text provided lists numerous words with prefixes related to various concepts, including medical procedures, behavior, and relationships. Many of these terms are derived from Latin roots and share similarities in meaning or sound. The list includes words like "predatory", "predaciousness", and "predominant" used in contexts like psychology, business, or natural science.
